Accordion

The Accordion plugin

This is a demo of the **Accordion** open source plugin.

▼ What does the **Accordion** plugin do?

The Accordion plugin allows for the creation of collapsible sections in a document that can be expanded or collapsed to show or hide additional content.

► How does it present to an end-user?

▼ Are there other Accordion options?

The Accordion plugin provides:

four commands (`InsertAccordion`, `ToggleAccordion`, `ToggleAllAccordions`, and `RemoveAccordion`); and two initialization options (`details_initial_state` and `details_serialized_state`).

See below for details

Got questions or need help?

Advanced List (List Styles)

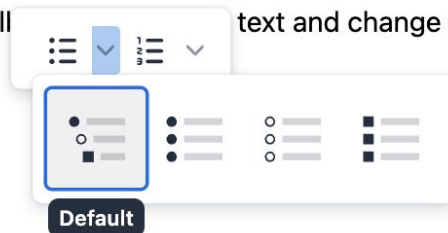

Advanced List Styles Demo

Basic Bulleted Lists

Try changing these bullet styles using the tool

context toolbar:

- Default bullet style
- Another item with default style
- Third item to demonstrate

text and change the list styles from the

Numbered Lists with Different Styles

Experiment with different numbering formats:

1. First step in the process
2. Second step with more details
3. Third step to complete the sequence

Nested Lists (Indentation)

Advanced List Styles Demo

Basic Bulleted Lists

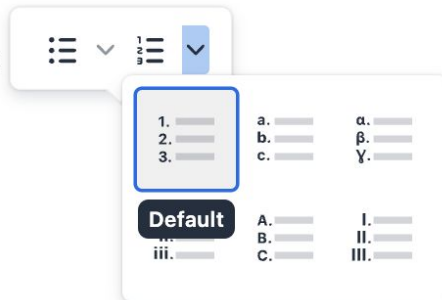

Try changing these bullet styles using the toolbar or highlighted text and change the list styles from the context toolbar:

- Default bullet style
- Another item with default style
- Third item to demonstrate

Numbered Lists with Different Styles

Experiment with different numbering formats:

1. First step in the process
2. Second step with more details
